

SOUTH CAROLINA

Engineering / Industrial Technology Education

2008-2009

APPROVED TEXTBOOKS FROM GOODHEART-WILCOX PUBLISHER
COURSES – INDUSTRIAL EDUCATION 1, 2, 3

Technology: Design and Applications

by R. Thomas Wright and Ryan A. Brown ©2008, 736 pages

Technology: Design and Applications is an exciting, introductory technology education text that provides in-depth coverage of the content defined in the *Standards for Technological Literacy*. Coverage includes the impacts of technology, technological systems, the history of technology, applying technology, and the designed world (agriculture and biotechnology, construction, manufacturing, information and communication, transportation, energy and power, and medical technology). This edition includes updated information on safety, job skills, technological needs and wants, and technological impacts.

- Strong focus on developing design and problem-solving skills.
- Curricular Connections relate chapter content to math, science, social studies, and language arts.
- "Technology Explained" features highlight and discuss a variety of current technologies.
- Career Highlights present information about careers related to various technological fields.

Technology

by R. Thomas Wright ©2008, 768 pages

The latest edition of **Technology** will help students realize how technology affects people and the world in which we live. Numerous illustrations and easy-to-read text enable understanding of how people use technology and why technological systems work the way they do. Student-friendly features, such as Tomorrow's Technology Today, Technology Explained, Connections to Technology, and Career Corners, provide numerous practical examples of the impacts of technology on our world. This edition of the book has a broadened scope, with information on automation and robotics, digital photography, digital signals, and job skills and employment. The book is fully correlated to the *Standards for Technological Literacy*.
