Standard	Textbook
Domain 1.0 Software	
1.1 Compare and contrast common operating systems and their functions and features.	
Types	p. 94–104
Software compatibility for different OS types and versions	p. 94–95, 123
Awareness of hardware compatibility for OS support	p. 94–95
Basic functions of an operating system	p. 94–104
1.2 Identify common programs, applications and their purpose.	
Types	p. 109–123
Platforms	p. 113–114
Common file types	p. 138–139
1.3 Given a scenario, use software management best practices.	
Install/uninstall	p. 123–127
Patching/updates for OS, drivers, applications and security software	p. 125–126
Software version identification and compatibility	p. 111–112
Licensing	p. 110–111, 337–338
1.4 Identify the following alternative technologies and their purpose.	
Virtualization	p. 691–692
Cloud computing	p. 9, 613
Web applications	p. 15–18, 591–593, 612–613
VoIP	p. 611
Telepresence	p. 620
Gesture-based interaction	p. 54
1.5 Explain the basic software features and functions of wireless devices.	
Unlocking/security	p. 575–576, 651–652
Bluetooth pairing	p. 563
Wireless connection setup	p. 562–563
Email configuration	p. 590–593
Screen orientation	p. 39–40
Synchronization configuration	p. 16
Airplane mode	
Stores for mobile applications	p. 114
Domain 2.0 Hardware	
2.1 Identify basic wired and wireless peripherals and their purpose.	
Output devices	p. 60–69
Input devices	p. 50–60
Input and output devices	p. 11, 54, 71–73, 608
2.2 Compare and contrast common computer connector types.	
Video	
FireWire	
eSATA	
Thunderbolt	
USB	
PS/2	
Parallel

Serial	
RJ-45	
RJ-11	
Audio	
Power	
2.3 Identify the purpose of internal computer components.	
CPU	p. 44–45
Power supply	
RAM	p. 42–43
Storage	p. 42–43
Expansion cards	p. 45
Motherboard/mainboard	p. 45
System cooling	p. 186
Domain 3.0 Security	
3.1 Define basic security threats.	
Malware	p. 639
Phishing	p. 642–643
Social engineering	p. 640
Spam	p. 602
Password cracking	p. 664–667
Physical security	p. 637–677
3.2 Given a scenario, use security best practices.	
Password management	p. 665–667
Device hardening	p. 573–578
Open WiFi vs. secure WiFi	p. 575–576
Multifactor authentication	p. 646–647
Suspicious emails	p. 645–657
Act on security software alerts	p. 669–671
Admin vs. user vs. guest account	p. 100
3.3 Given a scenario, use web-browsing best practices.	
Recognize a secure connection/website	p. 646, 656
Recognize invalid certificate warnings	
Recognize suspicious links	p. 656–657
Recognize suspicious banner ads	p. 642
Recognize adware symptoms	p. 639
Limit the use of personally identifiable information	p. 651–658
Update browsers and plugins	p. 522–523
Disable unneeded/suspicious browser plugins, toolbars and extensions	p. 522–523
Disable autofill forms/passwords	
Clear browser cache/history/cookies	p. 641–642
Recognize untrusted source warnings	p. 527–531
Risks of using public workstations	p. 676–677
Domain 4.0 Networking	
4.1 Given a scenario, set up and configure a basic SOHO router (wired/wireless).	
Verify wired connection, if applicable	p. 558–564

Set WEP vs. WPA vs. WPA2	p. 575–576
Change SSID from default	p. 651–652
Apply a new wireless password	p. 675–676
Change admin password for router	p. 559
Connect to the new network	p. 564
Verify Internet connectivity	p. 512–514
Update firmware if necessary	p. 47, 196
4.2 Compare and contrast cellular, wireless and wired data connections.	
High vs. low mobility	p. 606–609
High vs. low availability	p. 606–609
High vs. low throughput/bandwidth	p. 606–609
High vs. low reliability	p. 606–609
Connection delay	p. 606–609
Number of concurrent connections	p. 606–609
Levels of security	p. 652
4.3 Compare and contrast different methods of sharing and storage.	
HTTP vs. HTTPS	p. 646
FTP vs. FTPS vs. SFTP	p. 514, 646
Local vs. hosted storage	p. 15–18
Peer-to-peer	p. 570, 674
Network vs. local printing	p. 228–230
Domain 5.0 Basic IT Literacy	
5.1 Perform appropriate steps to set up a basic workstation.	
Plug in cables	p. 196
Power on computer	p. 96, 98–100, 101–103
Follow initial operating system setup wizard	
Install security software	p. 648, 670–671
Configure peripherals (if applicable)	p. 197–198
Uninstall unneeded software (if applicable)	p. 126
Configure and verify Internet connection	p. 512–514
Install additional software (if applicable)	p. 124–125
Run software and security updates	p. 125–126
Other user accounts (if applicable)	p. 100
Basic cable management	p. 196
5.2 Explain the basic methods of navigating an operating system.	
Executing programs	p. 215–216
Difference between shortcuts and files	
Manipulating files	p. 157–162
Read-only vs. modifiable files	p. 164–166, 254
Navigate a file structure	p. 135–143
Search, sort and display files	p. 150–152
Create screen captures	
Navigate with hot keys	p. 98, 218
Folder and file size	p. 165
Accessibility options	p. 101

Folder and file permissions	p. 100, 164, 166
5.3 Given a scenario, implement basic support concepts.	
Check for external issues	p. 191–205
Manufacturer documentation	p. 191–192
Manufacturer websites	p. 192–193
Technical community groups	p. 191–192
Internet search engine	p. 191–192
Contact technical support	p. 191, 198
5.4 Explain basic backup concepts.	
Importance of backups	p. 168–169, 668
Scheduling	p. 168–169
Frequency	p. 168–169, 668
Storage mediums	p. 168, 668
Backup verification and testing	
5.5 Describe the importance and impact of various environmental and safety concepts.	
Proper disposal methods	p. 180 (Green Tech), 295 (Green Tech), 300 (Writing), 647–648
Power	p. 8 (Green Tech), 101–103, 320 (Green Tech), 472 (Green Tech), 568 (Green Tech), 668
Device placement	p. 186
Electrostatic discharge concepts	
Ergonomic concepts	p. 526–527
Follow manufacturer safety guidelines
