Correlation of Guide to Good Food

to Pre-PAC

Domains and Competencies for *Nutrition, Food, and Wellness*

The American Association of Family and Consumer Sciences (AAFCS) in collaboration with AAFCS members and business, industry, and education leaders developed the *Pre-Professional Assessment and Certification (Pre-PAC) Program.* AAFCS administers these standards-based assessments for pre-professionals in family and consumer sciences career areas. The background sources used in developing these assessments include the National Standards for Family and Consumer Sciences, the Career Clusters Initiative, and input from business and industry leaders.

The following chart correlates the domains and competencies of the *Nutrition, Food, and Wellness* Pre-PAC assessment with the content of *Guide to Good Food.* For each competency, the chart lists the chapter number(s) and appendixes that identify the content location.

After studying the content of this text, students will be able to achieve the following competencies:

Doma	Domain 1: Wellness		
Asses cultur indivio	etency 1A is emotional, psychological, spiritual, al, and intellectual influences on dual/family food choices and nutrition ellness across the lifespan.	Text Concepts (Related Text Components)
