

Correlation of Introduction to Anatomy and Physiology (Goodheart-Willcox Publisher ©2024) to Oregon High School Life Sciences Standards (2022)

Introduction to Anatomy and Physiology covers all body systems using a student-friendly writing style that makes complex subjects easier to understand. Written specifically for the high school market, the chapters in this textbook are divided into lessons, providing content in a manageable format for the student. To add realism, clinical case studies and real-world applications enhance student interest and involvement. An abundance of study aids, such as learning objectives, lesson summaries, and extensive assessment opportunities increase students' ability to succeed in this challenging course.

Standards / Objectives / Indicators	Textbook Pages	
HS.LS1: From Molecules to Organisms: Structure and Processes		
HS.LS1.1. Construct an explanation based on evidence for how the structure of DNA determines the structure of proteins which carry out the essential functions of life through systems of specialized cells.	Chapter 2: <i>In the Lab</i> #2, 60; <i>Thinking</i> <i>Critically</i> , 91 Supporting content: <i>Proteins</i> , 51-52; <i>DNA</i> , 56-57; DNA, RNA, and Proteins, 68-71	
HS.LS1.2. Develop and use a model to illustrate the hierarchical organization of interacting systems that provide specific functions within multicellular organisms. (LS1.A)	Chapter 1 Supporting content: Engineering Practices, 24; Step 5: Analyzing and Evaluating the Data with Statistical Tools, 28-29	
HS.LS1.3. Plan and conduct an investigation to provide evidence that feedback mechanisms maintain homeostasis.	Chapter 1: Check Your Understanding #1-4, 18; In the Lab #2-3, 19 Chapter 11: In the Lab #1, 461 Supporting content: Homeostasis, 15-18
