5.0 Hardware and Network Troubleshooting		
5.1 Given a scenario, use the best practice methodology to resolve problems.		
Always consider corporate policies, procedures, and impacts before implementing changes		pg. 611 Establish a Theory of Probable Cause
1. Identify the problem		pg. 610–611 Identify the Problem
	Question the user and identify user changes to computer and perform backups before making changes	pg. 610–611 Identify the Problem
	Inquire regarding environmental or infrastructure changes	pg. 610–611 Identify the Problem
	Review system and application logs	pg. 610–611 Identify the Problem
2. Establish a theory of probable cause (question the obvious)		pg. 611 Establish a Theory of Probable Cause
	If necessary, conduct external or internal research based on symptoms	pg. 611 Establish a Theory of Probable Cause
3. Test the theory to determine cause		pg. 611 Test the Theory to Determine Cause

	Once the theory is confirmed, determine the next steps to resolve problem	pg. 611 Test the Theory to Determine Cause
	If theory is not confirmed reestablish new theory or escalate	pg. 611 Test the Theory to Determine Cause
	4. Establish a plan of action to resolve the problem and implement the solution	pg. 611–612 Establish a Plan of Action
	5. Verify full system functionality and, if applicable, implement preventive measures	pg. 612 Verify Full System Functionality and Implement Preventive Measures
	6. Document findings, actions, and outcomes	pg. 612 Document Findings, Actions, and Outcomes
5.2 Given a scenario, troubleshoot problems related to motherboards, RAM, CPUs, and power.
