Correlation Introduction to Computer Science: Java Programming, (2021)
Texas Essential Knowledge And Skills For Career Development
And Career And Technical Education
Science, Technology, Engineering, And Mathematics

Science, Technology, Engineering, And Mathematics
Course Name and Number: 127.789 Computer Science I (Grade 9-12)

Standards

(c) mareadones		
) Career and technical education instruction provides content aligned with challenging academic standards,		
industry-relevant technical knowledge, and college and career readiness skills for students to further their		
education and succeed in current and emerging professi		
	The Science, Technology, Engineering, and Mathematics (STEM) Career Cluster focuses on planning, managing,	
•	and providing scientific research and professional and technical services such as laboratory and testing services	
and research and development services.		
) Computer Science I will foster students' creativity and innovation by presenting opportunities to design,		
implement, and present meaningful programs through a variety of media. Students will collaborate with one		
another, their instructor, and various electronic commu	· · · · · · · · · · · · · · · · · · ·	
course. Through computational thinking and data analys		
strategies, and use computer science concepts to access	·	
	problems. By using computer science knowledge and skills that support the work of individuals and groups in	
solving problems, students will select the technology ap	•	
	gital citizenship by researching current laws, regulations,	
, , , , , , , , , , , , , , , , , , , ,	t. Students will gain an understanding of the principles of	
computer science through the study of technology operations, systems, and concepts.		
(4) Students are encouraged to participate in extended lear	ning experiences such as career and technical student	
organizations and other leadership or extracurricular org	anizations.	
(5) Statements that contain the word "including" reference	content that must be mastered, while those containing	
the phrase "such as" are intended as possible illustrative examples.		
(d) Knowledge and Skills		
(1) Employability. The student identifies various employment opportunities in the computer science field. The		
student is expected to:		
(A) identify job and internship opportunities and		
accompanying job duties and tasks and contact one	446-447	
or more companies or organizations to explore		
career opportunities;		
	44C 451 447 (Handa On Evanorla 15 2 1)	
(B) examine the role of certifications, resumes, and	446-451, 447 (Hands-On Example 15.2.1),	
portfolios in the computer science profession;	Investigating Certification , 452 (Hands-On	
	Example 15.2.2), Submitting a Résumé

Standards	Correlating Text Pages
(C) employ effective technical reading and writing skills;	446
(D) employ effective verbal and non-verbal communication skills;	446
(E) solve problems and think critically;	10, 12, 439-440, 446-447
(F) demonstrate leadership skills and function effectively as a team member;	446-447
(G) communicate an understanding of legal and ethical responsibilities in relation to the field of computer science;	458-459, 460 (Hands-On Example 16.1.1), Locating Information's Source
(H) demonstrate planning and time-management skills; and	446-447
(I) compare university computer science programs.	446
(2) Communication and collaboration. The student communicates and collaborates with peers to contribute to his or her own learning and the learning of others. The student is expected to:	
(A) participate in learning communities as a learner, initiator, contributor, and teacher/mentor; and	447

	Standards	Correlating Text Pages
(B)	seek and respond to advice from peers, educators, or professionals when evaluating quality and accuracy of the student's product.	446-447
	gramming style and presentation. The student utilizes prosentation of data, input, and output. The student is expec	
(A)	create and properly label and display output;	119-124, 485-486
(B)	create interactive input interfaces, with relevant user prompts, to acquire data from a user such as console displays or Graphical User Interfaces (GUIs);	87, 89, 395, 396
(C)	write programs with proper programming style to enhance the readability and functionality of a code by using descriptive identifiers, internal comments, white space, spacing, indentation, and a standardized program style;	55-57
(D)	format data displays using standard formatting styles; and	75-77, 75 (Java's Keywords and Reserved Words)
(E)	display simple vector graphics using lines, circles, and rectangles.	185-191, 188 (Math and Java), Graphing a Linear Equation, 190 (Science and Java), JavaFX Rainbow
(4) Critical thinking, problem solving, and decision making. The student uses appropriate strategies to analyze problems and design algorithms. The student is expected to:		
(A)) use program design problem-solving strategies such as flowchart or pseudocode to create program solutions;	9-10, 12, 439-440

Web www.g-w.com Orders 800.323.0440 Phone 708.687.5000 Fax 708.687.5068

Standards	Correlating Text Pages
(B) create a high-level program plan using a visual tool such as a flowchart or graphic organizer;	394-401, 400 (Language Arts and Java), Effective GUI Design
(C) identify the tasks and subtasks needed to solve a problem;	9-10, 12, 439-440
(D) identify the data types and objects needed to solve a problem;	9-10, 12, 439-440
(E) identify reusable components from existing code;	33, 43-44
(F) design a solution to a problem;	9-10, 12, 439-440
(G) code a solution from a program design;	9-10, 12, 439-440
(H) identify error types, including syntax, lexical, run time, and logic;	35, 65, 219-220, 487-489
(I) test program solutions with valid and invalid test data and analyze resulting behavior;	125-126

Web www.g-w.com Orders 800.323.0440 Phone 708.687.5000 Fax 708.687.5068

Standards	Correlating Text Pages
(J) debug and solve problems using error messages, reference materials, language documentation, and effective strategies;	125-126
 (K) create and implement common algorithms such as finding greatest common divisor, finding the biggest number out of three, finding primes, making change, and finding the average; 	8-12, 11 (Math and Java), Sums of Powers Algorithm
 (L) create program solutions that address basic error handling such as preventing division by zero and type mismatch; 	8-12, 11 (Math and Java), Sums of Powers Algorithm
(M) select the most appropriate construct for a defined problem;	10, 12, 439-440, 446-447
(N) create program solutions by using the arithmetic operators to create mathematical expressions, including addition, subtraction, multiplication, real division, integer division, and modulus division;	100-105
(O) create program solutions to problems using available mathematics library functions or operators, including absolute value, round, power, square, and square root;	100-105, 154-157, 156 (Math and Java), Rounding in Java
(P) develop program solutions that use assignment;	8-12, 11 (Math and Java), Sums of Powers Algorithm
(Q) develop sequential algorithms to solve non- branching and non-iterative problems;	8-12, 11 (Math and Java), Sums of Powers Algorithm

Standards	Correlating Text Pages
(R) develop algorithms to decision-making problems using branching control statements;	8-12, 11 (Math and Java), Sums of Powers Algorithm
(S) develop iterative algorithms and code programs to solve practical problems;	8-12, 11 (Math and Java), Sums of Powers Algorithm
(T) demonstrate the appropriate use of the relational operators;	205
(U) demonstrate the appropriate use of the logical operators; and	206-209
(V) generate and use random numbers.	149-150
(5) Digital citizenship. The student explores and understands safety, legal, cultural, and societal issues relating to the use of technology and information. The student is expected to:	
(A) discuss and explain intellectual property, privacy, sharing of information, copyright laws, and software licensing agreements;	458-464 460 (Hands-On Example 16.1.1), Locating Information's Source, 461(Hands-On Example 16.1.2), Investigating Licensing Agreements
(B) practice ethical acquisition and use of digital information;	458-459, 460 (Hands-On Example 16.1.1), Locating Information's Source
(C) demonstrate proper digital etiquette, responsible use of software, and knowledge of acceptable use policies;	458-459, 471-473

Web www.g-w.com Orders 800.323.0440 Phone 708.687.5000 Fax 708.687.5068

Standards	Correlating Text Pages
(D) investigate privacy and security measures, including strong passwords, pass phrases, and other methods of authentication and virus detection and prevention; and	458, 463-464, 471-473
(E) investigate computing and computing-related advancements and the social and ethical ramifications of computer usage.	458-459, 460 (Hands-On Example 16.1.1), Locating Information's Source
(6) Technology operations, systems, and concepts. The student operations as they apply to computer science. The student is	
 (A) identify and describe the function of major hardware components, including primary and secondary memory, a central processing unit (CPU), and peripherals; 	28-32, 30 (Science and Java, 31 (Coding Conundrum)
(B) differentiate between current programming languages, discuss the general purpose for each language, and demonstrate knowledge of specific programming terminology and concepts and types of software development applications;	33-37, 34 (Language Arts and Java), 35 (High-Level Language Chart)
(C) differentiate between a high-level compiled language and an interpreted language;	36-37
(D) identify and use concepts of object-oriented design;	37
(E) differentiate between local and global scope access variable declarations;	219
(F) encapsulate data and associated subroutines into an abstract data type;	8

Standards	Correlating Text Pages
(G) create subroutines that do not return values with and without the use of arguments and parameters;	37, 120, 135, 333
(H) create subroutines that return typed values with and without the use of arguments and parameters;	37, 120, 135, 333
(I) create calls to processes passing arguments that match parameters by number, type, and position;	87, 89, 333
(J) compare data elements using logical and relational operators;	100-105
(K) identify and convert binary representation of numeric and nonnumeric data in computer systems using American Standard Code for Information Interchange (ASCII) or Unicode;	43-44, 45 (Figure 2-9 Unicode Characters)
(L) identify finite limits of numeric data such as integer wrap around and floating point precision;	121, 294-295
(M) perform numerical conversions between the decimal and binary number systems and count in the binary number system;	40, 42 (Math and Java), Algorithms for Converting Decimal to Binary
(N) choose, identify, and use the appropriate data types for integer, real, and Boolean data when writing program solutions;	76-77, 76 (Data Type Table)

Web www.g-w.com Orders 800.323.0440 Phone 708.687.5000 Fax 708.687.5068

Standards	Correlating Text Pages
(O) analyze the concept of a variable, including primitives and objects;	18, 37, 76-77
(P) represent and manipulate text data, including concatenation and other string functions;	145-146, 270-272
(Q) identify and use the structured data type of one- dimensional arrays to traverse, search, and modify data;	362-366
(R) choose, identify, and use the appropriate data type or structure to properly represent the data in a program problem solution; and	75-77, 76 (Data Type Table)
(S) compare strongly typed and un-typed programming languages.	77
