

The American Association of Family and Consumer Sciences (AAFCS) in collaboration with AAFCS members and business, industry, and education leaders developed the Pre-Professional Assessment and Certification (Pre-PAC) Program. AAFCS administers these standards-based assessments for pre-professionals in family and consumer sciences career areas. The background sources used in developing these assessments are driven by the industry standards with input from business and industry leaders, the NASAFACS National Standards for Family and Consumer Sciences, and the Career Clusters Initiative.

The following chart correlates the domains and competencies of the *Early Childhood Education Pre-PAC* assessment with the content of *Working with Young Children*. For each competency, the chart lists the chapter number(s) and appendixes that identify the content location. (*Note*: Because students may learn content that addresses these competencies through one or more courses, the chart identifies other Goodheart-Willcox textbooks that support the competencies.)

After studying the content of this text, students will be able to achieve the following competencies:
