

# Integrate G-W Resources in Your CTE Courses with Perkins V Funding

G-W is committed to helping you achieve your teaching goals while students master real-world skills. This includes finding educational resources that promote industry-aligned curriculum for high-growth, high-pay career opportunities in your state and meet your budget.

**The Carl D. Perkins Strengthening Career and Technical Education Act for the 21st Century** gives federal funding to your state and local community to provide high-quality CTE programs, from middle school to high school, starting with career exploration through skill attainment and career readiness.

## Perkins Q&A:

### How G-W Digital Solutions Meet Perkins Requirements

**How will G-W provide students with career information on employment opportunities that incorporate the most up-to-date information on high-skill, high-wage, or in-demand industry sectors or occupations?**

G-W provides digital access to curriculum, assessment, and instructor resources that support CTE courses in a Career Pathway. Foundational courses introduce students to a variety of available careers including information on salaries, required education, and skills needed to succeed in the industry. Titles aligned to industry certification include certification practice that improves student confidence in taking an exam.

[The G-W Career Navigator outlines the career clusters and corresponding G-W resources to help plan your course offerings for a variety of pathways.](#)

**How will G-W help provide career exploration or career development coursework, activities, or services for my course?**

G-W provides digital access to curriculum that includes examples of related careers in a career pathway with student activities where they engage in real-world scenarios to practice career-readiness skills and prepare for work-based learning experiences and future careers.

**How will G-W improve the academic and technical skills of the participating students?**

G-W provides digital access to curriculum, assessment, and teacher resources that are aligned to industry standards, making it easier to prepare for class, reinforce new concepts, and assess learning. Integrating workbooks and lab manuals, videos, animations, and hands-on activities directly relates to career success skills.

## What can Perkins funding be used for?

CTE teachers can request local applications for Perkins grants to purchase materials that support CTE programs, whether it is for [professional development](#), program development, career counseling, or learning platforms. Perkins V specifically notes that funds can be used for increasing the effective use of technology within career and technical education programs and programs of study. Each state has a list of allowed expenses, and while print textbooks, workbooks, and lab manuals may not be eligible, **instructor resources, online curriculum, activities, and additional supports found in G-W Online Solutions are purchased by districts all over the country using Perkins funding.** Perkins funding is made available each year.

## How do I apply?

Every state has a different application portal on their website. To find your state's application, navigate to your state's DOE website, select the CTE section, and look for Perkins information. Contacting a member of your state's CTE staff directory is also a great way to quickly find the information you need.

*Click on your state below for more Perkins Information:*

				<a href="#">Wyoming</a>

## What information do I need to complete an application?

### ■ Comprehensive Needs Assessment (updated once every 2 years) including:

Program CTE Performance Indicators, which include your district's graduation rates, academic proficiencies in core subjects, rates of placement in postsecondary programs and careers after graduation, and non-traditional program enrollment. The Comprehensive Needs Assessment also requires information on CTE program quality indicators. Each state selects which indicators are needed. Check the Perkins information for your state to know which indicator(s) will be used. These may include the number of students who:

- attained industry-recognized credentials/certifications,
- attained postsecondary (dual) credits,
- participate in work-based learning or,
- the percentage of CTE concentrators (students completing two or more CTE courses) achieving measures of success.

*NOTE: CTE Performance Indicators are usually tracked by your district. Ask your CTE Director or Principal for this information if you don't have it already.*

- How the program size, scope, and quality meets student population needs
- How the program is aligned to the needs of local in-demand industry sectors or occupations
- Program plan and progress of equal access for all students
