

Hands-On Maintenance and Light Repair

Can I assign the same content multiple times?

Yes, you can assign the same content more than once. However, this will produce multiple entries for the activity in both the Class Report and the Student Report.

If you would like to assign the same content more than once, we recommend entering a specific *Title* for it in the *Notes* settings to be able to differentiate the two versions in the Reports.

The image below shows how the assignments with titles would appear in the Class Report.
