

Hands-On Maintenance and Light Repair

What are the system requirements?

The following are the minimum system requirements required to utilize the platform.

Access

An Internet connection is required. Broadband cable, high-speed DSL, fiber-optic, or other equivalent is recommended.

Computer Operating System

Windows®: Intel® processor or compatible (AMD), Windows® 8/10, 2GB RAM minimum (4GB RAM recommended).

Macintosh®: Intel® processor 2GHz (PowerPC not supported), Mac OS® X v10.8 or higher, 2GB RAM minimum (4GB RAM recommended).

Supported Browsers

Chrome®, Firefox®, Safari®, or Edge®. Please use the most up to date version available.

Mobile

Apple iPad® tablets running iOS® 10 or later, using the Safari® browser.

Android tablets running Android 5 or later, using the Chrome® browser.

Chromebooks

The platform is compatible with the Chrome® browser. In this capacity, the platform is compatible with Chromebooks.

Screen Resolution

Screen resolution of 1024 x 768 or higher is recommended for best experience.

G-W Whitelisted Sites

Security programs or firewall restrictions may block the following domains. In these cases, it may be necessary to whitelist these domains (both http and https) on your school's web content filtering. Please check with your Information Technology department to assist in the whitelisting request.
