

Hands-On Maintenance and Light Repair

Instructor Support Documentation

Can I assign the same content multiple times?

Yes, you can assign the same content multiple times. This will produce multiple entries for that activity in both the Class Report and the Student Report.

The screenshot shows the 'Class Report' interface. At the top, there are three dropdown menus: 'School: GW Demo School', 'Class: Demo Class', and 'Assessment:'. The 'Assessment' dropdown is open, showing a list of lessons from Lesson 40 to Lesson 45. The first two items, 'Lesson 40' and 'Lesson 40', are highlighted with a red box, indicating that the same content can be assigned multiple times. Below the dropdown, there are tabs for 'SUMMARY' and 'QUESTION', and a search icon labeled '*=S'.

If you assign the same content multiple times, we recommend entering a specific title for it in the Notes settings to be able to differentiate the two instances in the reports.

The screenshot shows a dialog box titled 'Assign "Lesson 1 Pretest"'. On the left side, there are three icons: 'Who' (people icon), 'When' (calendar icon), and 'Notes' (pencil icon). The 'Notes' section is active, showing a text input field with the placeholder text 'Enter a title for this assignment (optional)'. This field is highlighted with a red box. Below it is another text input field with the placeholder text 'Enter notes or instructions about the assignment (optional)'.
