Video Clip Library
Click here to access fast-paced, focused videos that will hold student attention.
The Agiculture, Food, and Natural Resources Video Clip Library contains 30 new and original video clips scripted and produced by agriculture experts to enrich the student’s experience with this new text. The fast-paced, focused videos will hold student attention and won’t distract them with dated hairdos and fashion styles. Using the video clip library as part of your classroom instruction will help your students retain more information, generate enthusiasm for agriculture studies, and discover links between their agricultural studies and the world outside the classroom. The videos cover leadership styles, parliamentary procedure, agriscience fair projects and other topics that students will encounter in their studies.

**Table of Contents**
