

# Correlation of National Standards for Education and Early Childhood with *Working with Young Children*

The National Association of State Administrators of Family and Consumer Sciences (NASAFACS) established national standards for Education and Early Childhood in partnership with the American Association of Family and Consumer Sciences. These standards provide the framework for national, state, and local family and consumer sciences education programs.

The following chart correlates these NASAFACS Standards with the content of the *Working with Young Children* text. For each content standard, the chart lists explanatory competencies and the major text concepts that address each competency. Bold numbers indicate chapters in which the concepts appear.
