The Nursing Assistant: Foundations of Holistic Caregiving, Brief Edition presents the key information students need to become a nursing assistant. With this text's sharp focus on holistic care, students learn how to provide the care required of nursing assistants, while integrating and considering residents' bodies, minds, and spirits. Students will learn how to address the needs of residents, while providing high-quality care that is safe, effective, and compassionate. Richly illustrated step-by-step procedures teach students how to perform the tasks required of a nursing assistant in a long-term care facility, which is what distinguishes this version from the Comprehensive book. By mastering these skills, students will be prepared to pass the certification competency examination. The text and its supplements also include abundant reinforcement opportunities and practice questions for the certification competency examination, challenging students to apply what they have learned and preparing them for success when taking the exam.
